## NON-SPRINKLERED BUILDING SOG

### SCOPE

This guideline shall apply to all members of the Stoney Point Fire Department and shall be adhered to by all members.

### PURPOSE

To assist the Incident Commanders of incidents of this type to effectively manage and coordinate operations to ensure the safety of all personnel on the scene.

### DEFINITIONS

**SHALL** - Indicates a mandatory requirement.

**STANDARD OPERATING GUIDELINE (SOG)**- Documents that help establish how an organization will operate and how its members are expected to carry out specific duties outlined in general terms

### GUIDELINES

While en-route, try to obtain from emergency operations center the location of the reported fire in the building.

Upon arrival at the scene, size up is given to include strategic priorities of rescue, fire control, and property conservation.

Confer with personnel on site to determine type of fire and its location.

Ensure an evacuation has been started.

Typical tasks to be performed by specific companies at commercial non-sprinklered buildings:

Policy Number

**5A.004**

### *First Due Apparatus*

1. Will establish a water supply that may consist of hydrants, static sources, or advising other incoming units of the need for pumper tanker connections or drop tank operations.
2. Will deploy pre-connect line(s) to the area of the fire. Consideration should be given to the size line needed to control the given fire situation.
3. Will begin a primary search of the area in vicinity of the fire (advise command.)
4. Will begin an aggressive attack on the fire.
5. After knockdown is achieved begin salvage and overhaul operations.

### *Second Due Apparatus*

1. Assist to establish the water supply to attack pumper according to the type of water supply that is needed per the Incident Commander.
2. Deploy back-up line from attack pumper to provide support for initial line. Consideration should be given to the size line needed to help back up the initial line(s) fire the current fire conditions/situation.
3. Assist with ventilation requirements needed.
4. Provide additional support as requested by command.

### *Service Unit*

1. Officer or fire fighter from this unit can assume manpower officer if this position is not established.
2. Have personnel establish equipment pools and forward available manpower to manpower pool for rotation of initial crews and for the deployment of search/rescue groups to ensure a complete evacuation, and employee accountability.
3. Establish area for refilling of air cylinders.
4. Ensure adequate supply of air cylinders in equipment pool.

### *Third Due Apparatus and Tankers*

1. Assist with water supply if needed.
2. Position vehicle in area for availability.
3. Forward manpower to manpower pool for assignments.
