GUIDELINES

Why are our trucks and vehicles numbered, the way they are?

Our apparatus follow a four-digit numbering scheme used across Cumberland County, excepting the Fayetteville Fire Department. This scheme enables us to recognize what district or fire station house the vehicle/apparatus or personnel # is from and what type of apparatus/equipment it is.

Let's look at Pumper-Tanker 1331 as an example.

The 13 is a Stoney Point Fire District's number belonging to station # 13. All the apparatus and staff vehicles that belong to the Stoney Point District Station 13 will have the number 13 at the beginning. The third digit identifies what type of vehicle/apparatus or specialty vehicle the particular unit is.

Other apparatus/equipment designations include:

- 0: Personnel Number
- 1: Engine
- 2: Tanker
- 3: Pumper / Tanker
- 4: Brush
- 5: Ladder / Aerial
- 6: Service / Utility
- 7: Quick Response / Rescue / Transport Ambulance
- 8: Air & Airport Crash Units
- 9: Command

The last number tells us the sequence within a particular series. For example a department with more than one Pumper/Tanker will identify by simply adding the next number in sequence. (1331, 1332, 1333, etc) The number 4 tells us the truck is a rescue pumper. Other equipment designations include:

So let's review:
